#	RESPONSES	DATE
1	the last 2 days i had a bad pain in my kidneys, the doctor told me that i had an urinary infection for covid. the pain passed at first day with antibiotics - ciprofloxacin- (i don't know it in english, sorry)	10/29/2021 1:51 PM
2	Fainted on standing was second symptom	10/20/2021 10:57 AM
3	Still having constant body aches, more headaches than before covid, everything smells and tastes bad, lost 30lbs and still losing hair.	10/8/2021 2:38 PM
4	My body temperature was not over 36,7°C	9/24/2021 1:18 PM
5	I first did the home test because I had a very strange cough and a severe headache. The cough was very constant. Head felt like there's intense pressure.	9/22/2021 4:09 PM
6	I really thought I had a cold. Scratchy throat started on 7/9/21 two days before classic symptoms listed. Felt warmer, my body temp was higher than normal but not classed a fever as below 38 degrees.	9/12/2021 7:44 AM
7	I did not actually test positive for Covid-19. By the time I went to A & E the virus had left me. I was treated for pneumonia and pulmonary embolism. All the evidence for Covid was there.	7/15/2021 10:06 PM
8	An ambulance came out twice to see me but I managed to stay home	7/13/2021 11:20 AM
9	I do not have a high temperature, but have a fever.	6/4/2021 4:37 PM
10	The ambulance came out twice. I ran out of inhalers for my asthma and I couldn't get out of bed or keep anything down	5/15/2021 1:13 PM
11	No Symptoms at all, did not infect my partner	5/5/2021 1:19 AM
12	The morning I tested positive was 11th Jan. I did not feel that unwell, just a bit odd and tired with a tickle in my throat. Virus detected during routine lateral flow test done in morning at work. Manager mentioned as I was leaving that it was a very weak positive line. Symptoms developed a couple of hours on and lasted for about a week, except for the fatigue which went on for longer and was severe even after the self isolation period ended. I was back at work weekend of 23rd/24th and had to work half days rather than 12 hour shifts, felt exhausted, first 12 hour shift on 25th totally overwhelming with brain fog and tiredness. Am almost back to normal now (4th Feb) but still not running which I used to do 3 times a week. Note I am currently a care worker and had a Pfizer vaccine injection on 21st December and my second one on 6th January.	2/4/2021 11:22 PM
13	First symptom was croaky throat. Next day had temperature, cough & sore throat. Cough took over 2 weeks to clear.	2/4/2021 7:13 PM
14	My daughter was tested at work when she arrived that morning and had a low temperature.	1/31/2021 9:54 PM
15	I went to urgent care for sports injury which was my COVID-19 exposure. I was given dexamethasone and ketorolac injections and prescribed cyclobenzaprine HCl, Medrol, and ibuprofen. My husband became very sick, but I only had mild symptoms (maybe due to meds given for injury).	12/8/2020 4:17 PM
16	Didn't know I had it. No symptoms. Work tested employees. I was positive	8/11/2020 3:59 AM
17	My housemate had confirmed COVID-19 so I think I had it, though my symptoms were very mild	6/13/2020 8:19 PM
18	Exhausted after the smallest amount of exercise.. emptied the dishwasher, slept for 3 hours!	6/13/2020 1:50 PM
19	My oxygen sats dropped to 89% at home at one point and I was tachycardic on exertion. Seen in gp out of hours - sats 94%. This was before covid was around so much so presumed flu and secondary chest infection. Have asthma so give antibiotics and steroids.	6/3/2020 12:36 AM

Coronavirus (COVID-19) and Multiple Endocrine Neoplasia

20	Was so ill taking daily medication was a challenge and ability to perform any whole body movements were extremely exhausting	6/2/2020 12:36 AM
21	Sense of smell and taste not returned... blisters on toes still itch...	5/9/2020 8:21 AM
22	The antibiotics were prescribed to treat a secondary infection in the lower respiratory system caused by COVID-19, resulting in severe breathing difficulties on April 25th when I attended A&e, oxygen levels and blood pressure were low. I have had breathing difficulties and mucus for over 7 days now.	5/4/2020 12:37 AM
23	My symptoms seem to last longer than others in family who don't have MEN2a	4/6/2020 9:11 PM
24	I was on a cruise in the Far East in January a lot of people were ill on the ship. My partner got symptoms first and then I did. We arrived home on Friday 24th January. On Monday 27th I was due back at work and felt awful so contacted my GP who told me to self isolate for 7 days and prescribed me a course of antibiotics which did help a bit. I wasn't tested but I feel there's a strong possibility I've had Coronavirus especially where I visited.	3/23/2020 3:27 PM
25	Breathlessness, on exhaustion	3/23/2020 12:52 PM
