Answered: 11 Skipped: 10

#	RESPONSES	DATE
1	My body temperature was not over 36,7°C	9/24/2021 1:18 PM
2	I really thought I had a cold. Scratchy throat started on 7/9/21 two days before classic symptoms listed. Felt warmer, my body temp was higher than normal but not classed a fever as below 38 degrees.	9/12/2021 7:44 AM
3	An ambulance came out twice to see me but I managed to stay home	7/13/2021 11:20 AM
4	I do not have a high tempetarure, but have a fever.	6/4/2021 4:37 PM
5	The ambulance came out twice. I ran out of inhalers for my asthma and I couldn't get out of bed or keep anything down	5/15/2021 1:13 PM
6	No Sympoms at all, did not infect my partner	5/5/2021 1:19 AM
7	The morning I tested positive was 11th Jan. I did not feel that unwell, just a bit odd and tired with a tickle in my throat. Virus detected during routine lateral flow test done in morning at work. Manager mentioned as I was leaving that it was a very weak positive line. Symptoms developed a couple of hours on and lasted for about a week, except for the fatigue which went on for longer and was severe even after the self isolation period ended. I was back at work weekend of 23rd/24th and had to work half days rather than 12 hour shifts, felt exhausted, first 12 hour shift on 25th totally overwhelming with brain fog and tiredness. Am almost back to normal now (4th Feb) but still not running which I used to do 3 times a week. Note I am currently a care worker and had a Pfizer vaccine injection on 21st December and my second one on 6th January.	2/4/2021 11:22 PM
8	Didn't know I had it. No symptoms. Work tested employees. I was positive	8/11/2020 3:59 AM
9	Exhausted after the smallest amount of exercise.. emptied the dishwasher, slept for 3 hours!	6/13/2020 1:50 PM
10	The antibiotics were prescribed to treat a secondary infection in the lower respiratory system caused by COVID-19, resulting in severe breathing difficulties on April 25th when I attended A&e, oxygen levels and blood pressure were low. I have had breathing difficulties and mucus for over 7 days now.	5/4/2020 12:37 AM
11	My symptoms seem to last longer than others in family who don't have MEN2a	4/6/2020 9:11 PM
